Su Jok Academy

- Su Jok Therapy by Prof. Park Jae Woo is a fundamental research of the systems of correspondence to the human body that are found on hands and feet. It reveals the mechanisms which are the basis of the deep internal energy and information interrelationships between diverse structural and functional components of the human body. The book describes the original nonmedicamental method of treating an wide range of diseases by targeted stimulations of correspondence points on hands and feet. - The book is intended for physicians of different fields, as well as for nonprofessionals who may wish to master the effective and easily accessible techniques of providing medical aid
